Enterprise Application Engineering  
Group 7

# OUR TEAM

Name	Role
Md Farhad Hossain	Product Owner & Developer
Neha Bobby	Scrum Master & Developer
Sudhandra Babu	Developer
Areeb Hussain	Developer
Soham Sandeep More	Developer
Padmaakarthy Subbulakshmi	Developer

# EPICS

- 1 • ESPW2-1 — Project Setup & Requirements
- 2 • ESPW2-2 — Core Ride & Rental Features
- 3 • ESPW2-3 — AI Recommendation & Verification System
- 4 • ESPW2-4 — Payment & Security System
- 5 • ESPW2-5 — Testing & Quality Assurance
- 6 • ESPW2-6 — Documentation & Presentation

# EPIC

The MoveWithMe Product Backlog is organized into six core Epics. Epics are large bodies of work that represent major functional areas or strategic initiatives within the project. This was done using the Jira tool.

# ROLE

- The **Product Owner (PO)** serves as the vision expert, responsible for prioritizing the work and defining what should be built to maximize value. In this project, Md Farhad Hossain fulfilled the role of Product Owner and was responsible for the final project summary, sprint planning, and GitHub setup.”
- The **Scrum Master (SM)**, Neha Bobby, supports the team by coaching them, ensuring adherence to the Scrum framework, facilitate daily meetings.

# SPRINT PLANING

It is the event where the team selects work from the Product Backlog to create the Sprint Backlog.

- We completed our sprint goal of project setup, team assignment, GitHub integration, and preparing the core features for development.

The screenshot displays a Jira Scrum board for 'ESPW2 Sprint 1' (30 Nov – 5 Dec) with 6 work items. The sprint goal is 'Complete the project setup and establish the basic user login, documents, and git repository for MoveWithMe.' The board shows six tasks, all of which are marked as 'DONE' and assigned to team members MH, NB, or SB. The tasks are:

ID	Description	Status	Assignee
ESPW2-7	User Story 1.1 — Create the Scrum Project	DONE	MH
ESPW2-8	User Story 1.2 — Assign Team Roles	DONE	NB
ESPW2-9	User Story 1.3 — Understand Project Requirements	DONE	MH
ESPW2-10	User Story 1.4 — Add All Members to Jira	DONE	MH
ESPW2-36	User Story 1.5 — Connect GitHub Repository	DONE	MH
ESPW2-11	User Story 2.1 — User Registration & Login	TO DO	SB

At the bottom of the board, there is a '+ Create' button.

# DAILY SCRUM

**The 15-minute time-boxed event where the Developers inspect progress toward the Sprint Goal using the Scrum Board.**

During each meeting, sometimes lasting more than 15 minutes.

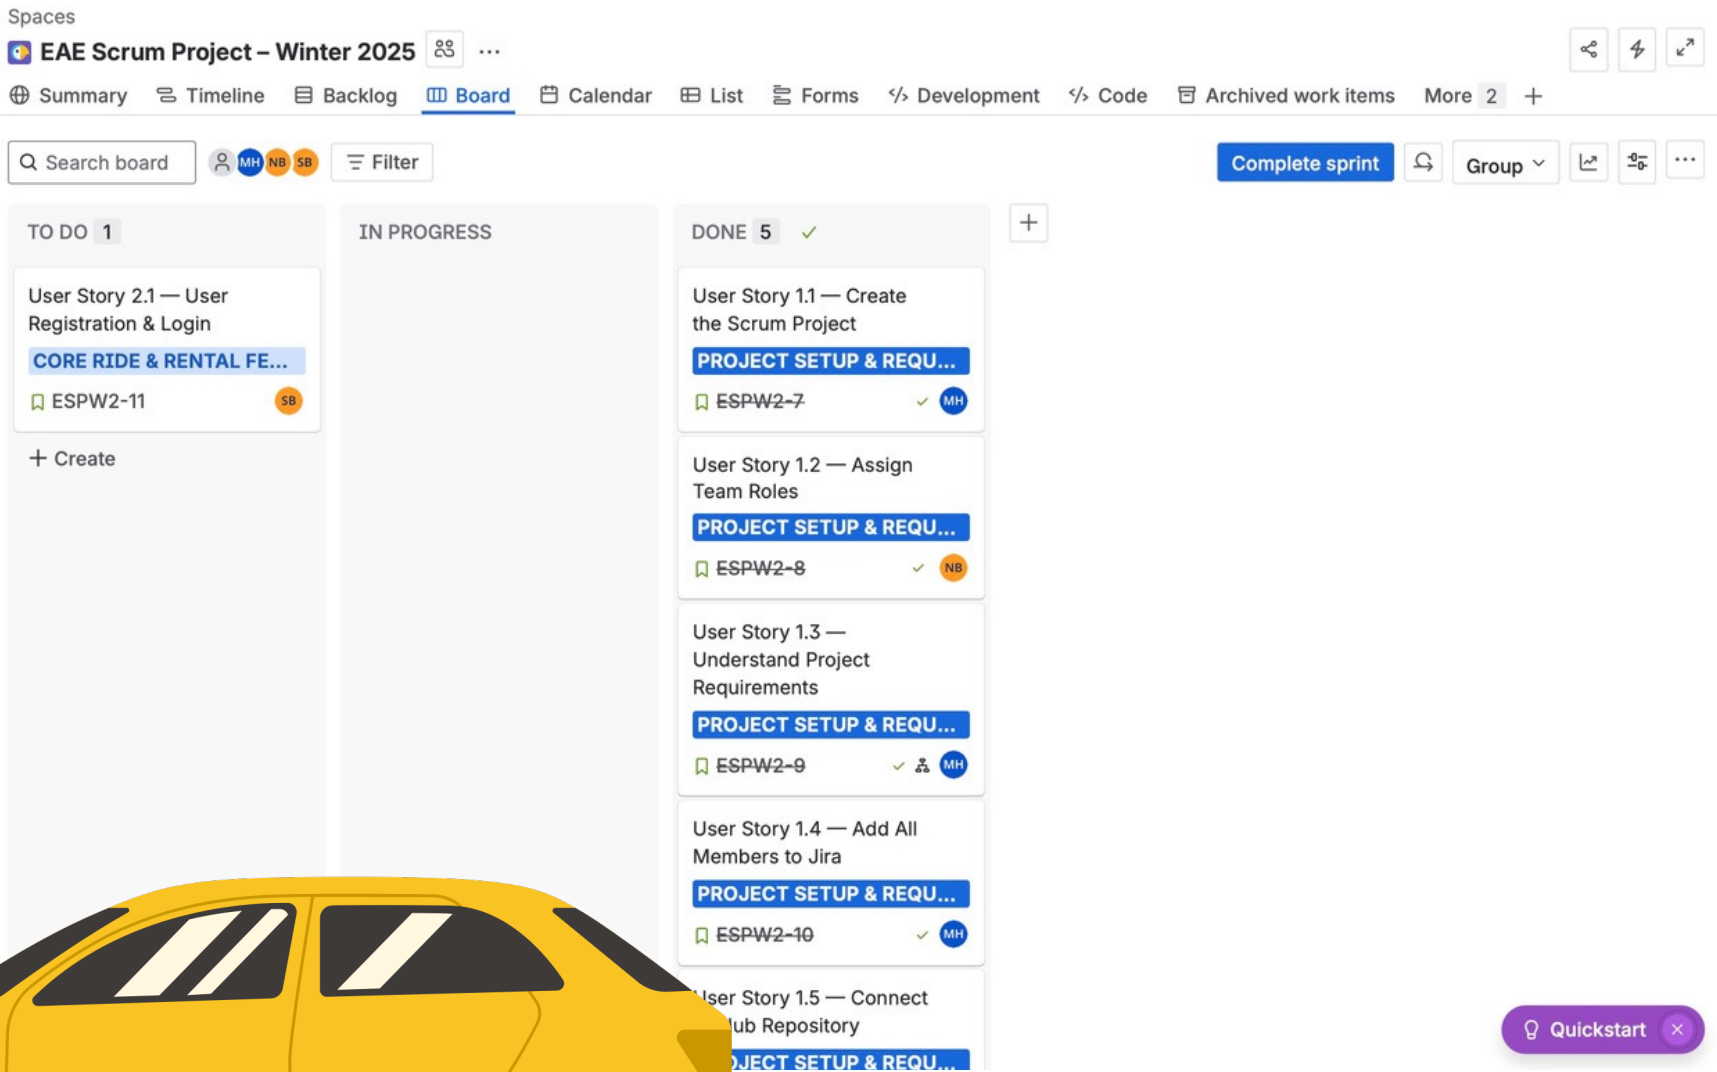

- We use our Scrum Board to manage and track our workflow.
- Sprint Planning begins in the To Do column, where all tasks move through the stages To Do → In Progress → Done.
- All tasks committed to in the sprint are reflected on this board.

# SCRUM BOARD

Visual tool used to track the progress of sprint tasks, showing work moving from To Do, to In Progress, to Done.

# BURNDOWN CHART

The burndown chart shows the remaining work in Sprint 1 and tracks progress toward completing all user stories. It visualizes how tasks decreased over time compared to the ideal burn rate.

The Chart shows the remaining work in Sprint 1, tracks the progress of all user stories. Illustrate how tasks decreased overtime, compared to the ideal burn rate

Sprint

ESPW2 Sprint 1

Estimation field

Work item count

**Date** - 30 November 2025 - 5 December 2025

**Sprint goal** - Complete the project setup and establish the basic user login, documents, and git repository for MoveWithMe.

\*Work item added after sprint start

# SPRINT RETROSPECTIVE

What Went Well (Good)	What Didn't Go Well (Bad)
Team collaborated effectively in Jira & GitHub	Minor confusion with branch naming
Roles were clearly understood	Some of us were unfamiliar with Jira navigation
Requirements were documented early	One user story remained incomplete
GitHub integration successful, And rules has been set in repository	Project Template Setup
All setup tasks finished on time	—

# SPRINT RETROSPECTIVE

Start	Stop	Continue
Make simple drawings or designs of the screens	Stop pushing directly to main	Continue using feature branches
Clearly describe what the feature must do so the team knows exactly when the work is considered	Stop working without naming conventions	Continue clear documentation in repo & Jira
—	—	Continue daily communication
